RE:WAIR

## MAKE A BAG OUT OF AN OLD SHIRT.

1

//Klip ryggen samt
ærmer af skjorten.
*Inkluder eksisterende
syninger fra ryggen.

//Cut the back and the
sleeves off the shirt.
*Include existing stitch-
ing from the back.

2

36cm

//Klip bunden af ryggen
og gem til senere.
//Cut off the bottom of
the back and save for
later.

3

x2

//Klip manchetterne af begge ærmer.
//Klip ærmerne op langs midten.

//Cut off the cuffs of both sleeves.
//Cut the sleeves up the middle.

4

12cm

//Klip 2 strimler af hvert ærme.
*Strimlerne skal være så lange som mulig, men mindst 12 cm bredden.

//Cut two strings of each sleeve.
*The strings should be as long as possible, but not smaller than 12 cm in width.
5

//Sy de 4 strimler sammen til 1 lang strimmel.
*ret mod ret.

//Sew all 4 strings together to make 1 long string.
*Print-sides facing.

6

//Fold strimlen langs midten.
//Sy ned langs midten.
*ret mod ret.

//Fold the strap over the middle.
//Sew down the centre.
*Print-sides facing.

7
//Vend strimlen igennem hullet så printet kommer til at vende ud.
*Hjælpemidler såsom en sikkerhedsnål er nødvendig.

//Turn the strap through the tunnel so the print side comes to front.
*Helping tool such as a safety needle is necessary.

RE:WAIR

8

//Buk den øverste kant af ryg-delen ned til den eksisterende syning så det danner en tunnel.
//Sy denne tunnel fast langs den eksisterende syning

//Fold the top of the back-piece down to the existing back stitch so it makes a tunnel.
Close this tunnel by sewing along the existing stitch.

9

//Fold skjorten ret mod ret langs midten og sy langs de eksistende syninger vi inkluderende i punkt 1.
//Fold the shirt along the centre, prints facing each other, and sew along the existing stitches we included in step 1.

10

//Træk "ærme-stroppen" igennem tunnelen.
*Hjælpemidler såsom en sikkerhedsnål er nødvendig.

//Pull the strap through the tunnel.
*Tools such as a safety needle is necessary.

11

D

//Mål omkredsen (C) af
bunden af tasken.
//Brug formlen under til at
finde diameteren af bunden
af tasken.
//Brug rygstykket vi gemte i
punkt 2 til at klippe en cirkel.

$$\frac{C}{\pi} = D$$

//Measure the Circumference
of the bottom of the bag.
//Use the calculation above
to locate the diameter of the
buttom circle.
//Using the back-piece we
saved in step 2, cut a circle.

12

//Vend vrangen på tasken og sy bun-
den på tasken samtidig med at fast-
gøre enderne af stropperne i samme
sy-runde.

//Turn the bag inside-out and sew the
bottom on, including the loose ends of
the straps in the same stitch.

Tadaaah!
